2018 Progress Report

North Carolina looks like a lot of southern states, but North Carolina stands alone as the only southern state to take all five of our Bicycle Friendly Actions.

The most dramatic divergence from other southern states in its federal data is found in North Carolina’s use of federal funds for bicycling and walking. Since the state’s adoption of the BikeWalkNC plan and the Strategic Transportation Investments law in 2013, North Carolina’s federal data shows a pronounced oscillating trend towards a greater use of federal funds for bicycling and walking.

In other federal data, North Carolina is very close to the Southern regional average.

Federal Data on Biking  | Ten-Year Trend  | Ten-Year Rank
--- | --- | ---
Ridership | 0.2% of commuters biking to work | Slight decrease in bike commuting | 43/50

BikeWalk NC is a membership-based, statewide advocacy organization promoting non-motorized transportation choices for residents of and visitors to NC.

Our existing and potential support base includes shop owners, cycling clubs, transportation professionals, local advocacy organizations, elected officials, allied non-profits, business groups, government, environmental and health-oriented organizations and various individual advocates across the state interested in promoting people-powered transportation.

Vision:
“We envision a state where anyone can choose to bicycle, skate, run, and walk as normal, practical, healthy, safe and active transportation.”

Mission:
“To inspire and support advocacy and educational efforts throughout North Carolina for an environment that fairly and equitably accommodates bicyclists, skaters, pedestrians, and others using human-powered active transportation.”

The Bicycle Friendly States ranking is based on a comprehensive survey completed by state departments of transportation and state bicycling advocates. For more information, visit bikeleague.org/states or contact Ken McLeod at (202)-822-1333 or ken@bikeleague.org.
North Carolina 2018 PROGRESS REPORT

This Progress Report provides an update on North Carolina's efforts related to bicycling. A full report card based upon a comprehensive survey is available at: http://bikeleague.org/content/state-report-cards

### Federal Data on Biking

#### Featured Agency - North Carolina Department of Transportation (Agency did not respond)

According to the North Carolina Department of Transportation website “In 2013, the N.C. Board of Transportation adopted WalkBikeNC, a comprehensive statewide plan for improving bicycling and walking conditions across North Carolina.

Focused on five main principles – mobility, safety, health, the economy and the environment – WalkBikeNC looks at how investments into sidewalks, bike lanes and greenways benefit communities at relatively low costs and how bicycle and pedestrian accommodations are able to:

- Promote physical, mental and social well-being by providing outdoor places to relax, exercise and socialize,
- Provide easy walking or bicycling connections between neighborhoods, schools, parks and trails,
- Increase property values, promote tourism and foster local businesses by encouraging foot traffic, and
- Improve overall quality of life.”

---

Every member organization of the League of American Bicyclists gets free access to a powerful advocacy software package. In 2017, the League facilitated over a dozen actions that engaged thousands of people. In New Jersey, these efforts led to a law that requires that drivers are educated about bicyclist and pedestrian safety as part of their driver’s license training.

Learn about current actions and how your organization can use our tools at [https://bikeleague.org/TakeAction](https://bikeleague.org/TakeAction)
