Continue efforts to adopt a Complete Streets policy and offer implementation guidance. By adopting a Complete Streets policy, communities direct their transportation planners and engineers to routinely design and operate the entire right-of-way to enable safe access for all users, regardless of age, ability, or mode of transportation.

Adopt and implement the bicycle plan that is currently being prepared. Ensure that there is a feedback mechanism to help the community meet goals for the implementation of your bicycle plan.

Bicycle-safety education should be a routine part of education, for students of all ages, and schools and the surrounding neighborhoods should be particularly safe and convenient for biking and walking. Particularly as students learn to drive cars; it is important that they continue to learn about safe bicycling practices and how to safely share the road as drivers. Work with your local bicycle groups or interested parents to expand the Safe Routes to School program to all schools.

Provide a variety of targeted bicycle events to engage women, seniors, and other demographic groups that may benefit from non-traditional or group-specific bicycle events. Targeted events may help to encourage groups that have specific concerns about bicycling or which have not previously been engaged in supporting bicycling improvements.
