Develop a system of bicycle boulevards, utilizing quiet neighborhood streets, that creates an attractive, convenient, and comfortable cycling environment welcoming to cyclists of all ages and skill levels.

Install a bicycle wayfinding system with distance and destination information at strategic locations around the community, integrating preferred on street routes and off-street facilities.

Increase your efforts on Bike to Work Day and Bike to School Day. Ensure to widely advertise all bicycle-themed community events and programs. Create benchmarks for participation and work with local employers to foster competition about participation in Bike to Work Day and Bike to School day activities.

Take steps to improve and brand your bicycle network so that it is attractive to residents and tourists. Anacortes is well placed for bicycle tourism, but the community's network of bicycle facilities and routes needs to support a variety of rides that are attractive to potential visitors and useful for residents.

Increase the amount of staff time spent on improving conditions for people who bike and walk. Increasing staff time, either by creating a position or changing the responsibilities of current staff, can have a positive impact on the ability of your community to execute bicycling and walking-related projects and programs.

It is great to hear about the success of your Open Streets event. Consider how to build upon this success with other bicycling and walking-related events or a signature bicycle ride that will attract people to your community and help brand it as a bicycling destination.
