KEY STEPS TO SILVER

» Continue to expand the bike network and increase connectivity through the use of different types of bicycle facilities appropriate for the speed and volume of motor vehicle traffic on each road. On roads where automobile speeds regularly exceed 35 mph, provide protected bicycle infrastructure such as protected bike lanes. In slower speed areas such as quiet neighborhood streets, continue to develop a system of bicycle boulevards that create an attractive, convenient, and comfortable cycling environment welcoming to cyclists of all ages and skill levels.

» Develop community-wide Bicycle Parking Standards to ensure that APBP-compliant bicycle parking is available in areas near transit and urban activity centers. Without secure and convenient bicycle parking it is difficult for a person to choose to ride their bicycle for transportation or utilitarian trips.

» Continue increasing bike/transit integration through improved connectivity and routes to transit stops, including the Center Line route, and by expanding bike parking at all transit stops.

» Expand bicycle safety education to be a routine part of education for students of all ages, at all K-12 schools, and ensure that schools and the surrounding neighborhoods are particularly safe and convenient for biking and walking.

» Work with local League Cycling Instructors (LCIs) to offer Bicycle Friendly Driver training to motorists in Spokane, particularly to professional drivers and fleet operators.

» Work with law enforcement to ensure that enforcement activities are targeted at motorist infractions most likely to lead to crashes, injuries and fatalities among bicyclists. Traffic enforcement activities should be data-based and responsive to behaviors that have been observed to lead to crashes, injuries, and fatalities.

» Adopt a local or regional comprehensive road safety plan or a Vision Zero policy to create engineering, education, and enforcement strategies to reduce traffic crashes and deaths for all road users, including bicyclists and pedestrians.
