Your application indicated that the vast majority of roads in College Station have a posted speed limit above 25 mph. Consider lowering posted speed limits, particularly on neighborhood greenways and residential streets, to under 25 MPH. Introduce road diets, traffic calming measures, and bicycle boulevards to encourage slower driving speeds and create a more safe and inviting environment for bicyclists of all ages and abilities.

Continue to increase the amount of high quality bicycle parking throughout the community. Without secure and convenient bike parking it is difficult for a person to choose to ride their bicycle for transportation or utilitarian trips.

Continue to increase the amount of high quality bicycle parking at transit stops throughout the entire community. Continue making investments to improve bicycle access to transit hubs and to support more multi-modal travel, such as adding bike racks to buses.

Expand bicycle safety education to be a routine part of education for students of all ages, and ensure that schools and the surrounding neighborhoods are particularly safe and convenient for biking and walking. Work with local bicycle groups and interested parents to create Safe Routes to School programming for all K-12 schools, including on-bike education.

Host a League Cycling Instructor (LCI) seminar to increase the number of local LCIs in your community. Having several active instructors in the area will enable you to expand cycling education for youth and adults, recruit more knowledgeable cycling ambassadors, deliver Bicycle Friendly Driver education to motorists, and have experts available to assist in encouragement programs. Visit bikeleague.org/ridesmart for more information.
Develop education and encouragement outreach methods and programs that specifically target families, women, seniors, low-income, and non-English speaking communities, in addition to general non-targeted outreach and media campaigns that discuss current and new bicycle facilities, safe driver and bicyclist behavior, and events related to walking and biking.

Improve Bike Month activities by creating a Bike to Work Day event, Bike to School Day event, and/or a Mayor’s Ride. Bike to Work Day events can include competitions for participation between businesses and “energizer” stations where people can get coffee on the way to work. Bike to School Day events can include competitions related to bicycle use, outreach to parents, and coordination between the schools and the city to create safer routes to schools.

Develop a community-wide trip reduction ordinance/program, commuter incentive program, and a Guaranteed Ride Home program to encourage and support bike commuters in College Station.

Create an incentive program for businesses to provide standard bike parking, and to develop workplace bicycling programs for their employees. Use the framework of the Bicycle Friendly Business program to engage with more local businesses, agencies, and organizations to promote cycling to their employees and customers.

Create a bicycle count program that utilizes several methods of data collection to create an understanding of current bicyclists and the effects of new facilities on bicycling in College Station. Automated bicycle counters provide long-term data on bicycle use at fixed points in a community and mobile counters can provide periodic or before/after data related to a change in your community’s road or bicycle network. Observational counts and surveys can supplement automated data in order to collect demographic information and examine social equity goals. Consider partnering with Texas A&M to collect and analyze bike count data in the community.
