The inventory of on-road bicycle facilities reported on Battle Creek’s 2020 BFC application appears to be inconsistent or inaccurate. This lack of complete data makes it difficult to judge the current state of bicycling infrastructure in Battle Creek. Ensure that accurate, up-to-date data is available on both your roadway and bicycle networks so that your community can utilize GIS-based or other network analyses, create high-quality bike maps, and accurately assess the quality and reach of your bicycle network.

Continue to expand the bike network and increase connectivity within your community core, through the use of different types of bicycle facilities appropriate for the speed and volume of motor vehicle traffic on each road. Expand on-bike bicycle safety education to be a routine part of education for students of all ages, and ensure that schools and the surrounding neighborhoods are particularly safe and convenient for biking and walking. Work with the school district, local bicycle groups, and interested parents to create Safe Routes to School programming for all K-12 schools.

KEY STEPS CONTINUED ON PAGE 2...
» Battle Creek could be well-served by a bike co-op. In communities your size, co-ops have had major success in building a culture around youth/family cycling and coupled with after-school programming, job training and a connection point with local clubs/advocacy, this can be win-win-win.

» Crash and fatality rates are relatively high for your population and ridership rate. While motorist education is fairly well-considered, we’d like to see a quantifiable plan for reducing and eliminating crashes/fatalities while building bicycle use. Road diets, lane diets, and traffic calming treatments, along with significant investments in a low-stress bicycling network, are important engineering components for addressing safety.
